OBJECTIVE

Aspiring software developer with hands-on experience in Python, Django, React Native, and AI/ML technologies, seeking to contribute to impactful projects and gain deeper industry exposure.

EDUCATION

Karunya Institute of Technology and Sciences

B.Tech Computer Science and Technology (AI ML)

Jun 2026(expected)

Coimbatore, Tamil Nadu, India

St. Thomas Higher Secondary School

Higher Secondary Education

May 2022

Thiruvalla, Kerala, India

SKILLS

Languages: Python, C, Java, SQL, HTML, CSS

AI/ML & Data Science: BERT, Prophet, ARIMA, K-Means, YOLO, TinyLlama, Mistral, Hugging Face Transformers, Pandas, NumPy, Scikit-learn

Frameworks & Tools: Django, Streamlit, React Native, Expo Go, Mistral, Ollama, WAMP Server

Databases: MySQL, SQLite

Visualization: Plotly, Seaborn, Matplotlib

Soft Skills: Analytical Thinking, Problem Solving, Diligent, Eager to Learn, Team Player, Strong Work Ethic

EXPERIENCE

Faith Infosoft Software Development

Intern - Python Django Developer

May - July 2024

Changanassery, Kerala, India

- * Completed a two-month internship in Python Django development.
- * Contributed to live projects with dedication and professionalism.
- * Gained practical knowledge of backend development and project workflows.

PROJECTS

InvenSense - *Python, Streamlit, Prophet, ARIMA, K-Means, Pandas, Plotly, Seaborn, MySQL*

- Developed a web-based inventory system using Python and Streamlit with 80 percentage accurate demand forecasting (Prophet, ARIMA) and customer segmentation via K-Means clustering.
- Created interactive dashboards (Plotly, Seaborn) with real-time filters, low-stock alerts, ABC analysis, and export options (PDF/CSV), reducing stockout risk by 20 percentage.

GameZone Using React Native - *React Native, Expo Go*

- Compilation of 2D games in one app using React native
- This app contains different games like tictactoe, memory game, flappybird, minesweeper

Image-Based Food Recipe Generator - *Python, Streamlit, YOLO, Mistral, Ollama*

- Developed a food recipe generator that uses image recognition to identify ingredients in photos and generate relevant recipes.
- The system simplifies meal preparation by suggesting recipes based on available ingredients.

Multilingual Complaint Classification System - *Python, Streamlit, BERT,NLP,TinyLlama, MySQL, Hugging Face*

- Developed a web app to classify citizen complaints using BERT and DistilBERT, with multilingual support via Helsinki-NLP.
- Created a dataset of 2,000 complaints using TinyLlama and trained models with Hugging Face; stored data in MySQL.
- Built the frontend in Streamlit for submitting, translating, and tracking complaints; reduced manual work and improved response speed.
